

Chick Master Classic Hatchers

Accommodates any aisle width:
Available in both sliding and swinging door design.

Genesis IV Control: Touch screen simplicity and complete system control at your fingertips.

GeM Control Option:
The GeM, either as an upgrade or a new equipment control choice, is a valuable tool with 'always on, always visible' user friendliness.

Classic Vertical Fan Hatchers

The CVH range is designed for Chick Master Classic Series Fixed Rack setting systems. Features include: Automated, self-adjusting air intake damper that regulates the flow of fresh air and maintains a precise temperature and humidity environment. Compact rollout fan design provides unobstructed access to interior surfaces for cleaning.

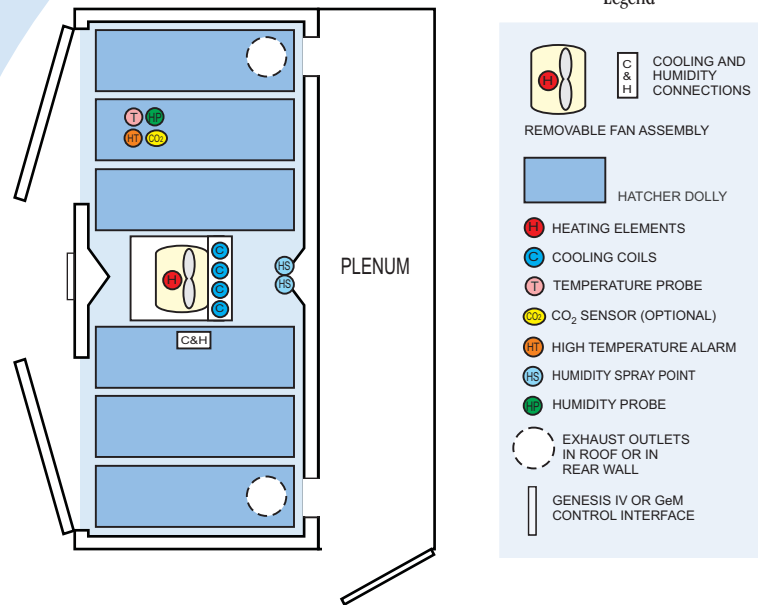

Plenums serve the double purpose of helping to maintain a consistent negative pressure pulling spent air from the hatcher and allowing a place for easy clean-up of accumulated airborne debris.

Compact rollout fan design provides unobstructed access to interior surfaces for cleaning.

CVH96 Internal Layout

Hi-Lites

Hi-Lites allow you to view the operational status of your hatchers at a glance without having to touch your control panel!

Light displays show hatcher functions and alarm conditions such as heating, cooling, humidity and high temperature alarm. This system is optional but extremely useful for instant peace of mind in busy operations.

CVH Series Vertical Fan Hatchers Capacities & Dimensions

Model/Tray	Capacity (chicken)	Width	Depth	Height
CVH96 -165	15,840 eggs	3,385mm (11'2")	1,791mm (5'4")	2,430mm (8')
